PROFILE

A Web Developer with 4 years of experience turning ideas into full-stack web applications. Skilled in building scalable systems across frontend and backend, with hands-on experience in cloud infrastructure administration. Eager to contribute to a collaborative team that values quality, growth, and impact.

HARD SKILLS

Programming
- Javascript
- Typescript
- Python

Frameworks
- React
- NodeJs
- Docker
- Sequelize
- Django / Flask
- Tailwind

Database
- MS SQL
- PostgreSQL
- MySQL

Tools & Platforms
- SQL Server Management Studio
- Docker Platform
- DigitalOcean
- Jira / Slack / GitHub / Teams
- Postman / Odoo
- BitBucket / Gitea

SOFT SKILLS

- Critical Thinking
- Communication
- Collaboration
- Problem Solving
- Flexibility

CERTIFICATIONS

- HackerRank - React (Basic)
- HackerRank - JavaScript (Basic)
- AWS Educate - Cloud 101
- AWS Educate - Cloud Ops
- AWS Educate - Networking
- Dean's Lister Award, BSU 2021

EDUCATION

BATANGAS STATE UNIVERSITY
The National Engineering University
Alangilan Campus
BS Information Technology
Major in Service Management
2018 — 2022

EXPERIENCE

DE LOS SANTOS MEDICAL CENTER | Business System Specialist
July 2025 – Present

- Built an internal support web system for IT staff using React and TypeScript to streamline system maintenance, data corrections, and administrative support tasks.
- Maintained and enhanced two core hospital systems built with PHP and Laravel, ensuring stability, resolving system issues, and supporting daily operations used by hospital staff.
- Initiated and implemented version control practices across the entire codebase using Git, improving collaboration, code tracking, and deployment reliability.
- Integrated Microsoft Graph API to implement authentication, employee validation, and group-based authorization, enabling secure role-based access control for the document permission management system.
- Resolved a critical SSL configuration issue in the Rhapsody integration system, restoring secure system communication and preventing service disruptions.

NUCLEIO TECHNOLOGIES IT SOLUTIONS | Web Developer
March 2023 – June 2025

- Designed and built an online platform offering document and data services tailored to meet consumer needs.
- Created a REST API using Flask that connects to a third-party service provider to facilitate integration within the system.
- Developed the frontend using Django and integrates seamlessly with the Flask backend.
- Delivered a solution that met the project's requirements, optimizing functionality and performance while conducting thorough tests to ensure quality and reliability.

LIBERA | Web Developer
September 2022 – March 2023

- Played a key role in developing, customizing, debugging, and maintaining the ERP system to ensure it met design specifications and requirements.
- Responsible for maintaining, deploying, and monitoring the DigitalOcean cloud server infrastructure to ensure stability and reliability of cloud-based services.
- Utilized Slack, Jira, and GitHub to enhance collaboration and productivity, aiming for high-quality deliverables.

NUCLEIO TECHNOLOGIES IT SOLUTIONS | Intern, Web Developer
January 2022 – September 2022

- Managed and maintained project deployments on the company's server infrastructure comprehensively.
- Integrated a map feature for location pinning within the web app using a custom REST API.
- Contributed to various ongoing projects with minimal supervision, demonstrating initiative and reliability.
- Collaborated with team members to resolve bug fixes and implement modifications while upholding high-quality standards.

P R O J E C T S

MAPAMANIAPH

A quiz app that lets you guess the provinces, cities, and municipalities of the Philippines by typing the answer of the highlighted and shown figure

https://mapa-mania-ph.vercel.app

<> REACT | TAILWIND | JAVASCRIPT | SVG

PH_PROVINCE_MAP_SVG

A simple and customizable collection of SVG maps for all provinces in the Philippines. Perfect for data visualization, geographic apps, and interactive maps.

https://github.com/JeyBySy/PH_PROVINCE_MAP_SVG

<> GIMP | SVG

AIMWORKS

A browser-based aim training game inspired by Aimlabs, featuring dynamic target spawning and a scoring system. Built with HTML5, CSS, and JavaScript using Canvas API for rendering and game loop architecture
