EXPERIENCE

NUCLEIO TECHNOLOGIES IT SOLUTIONS | WEB DEVELOPER

March 2023 – March 2024

- Designed and built an online platform offering document and data services tailored to meet consumer needs.
- Created a REST API using Flask that connects to a third-party service provider to facilitate integration within the system.
- Developed the frontend using Django and integrates seamlessly with the Flask backend.
- Delivered a solution that met the project's requirements, optimizing functionality and performance while conducting thorough tests to ensure quality and reliability of the project.

LIBERA | WEB DEVELOPER

September 2022 – March 2023

- Played a key role in developing, customizing, debugging, and maintaining the ERP system to ensure it met design specifications and requirements.
- Responsible for maintaining, deploying, and monitoring the DigitalOcean cloud server infrastructure to ensure the stability and reliability of company's cloud-based services
- Utilize Slack, Jira, and GitHub to enhance collaboration and productivity, aiming for high-quality deliverables.

NUCLEIO TECHNOLOGIES IT SOLUTIONS | INTERN, WEB DEVELOPER

January 2022 – September 2022

- Managed and maintained project deployments on the company's server infrastructure comprehensively.
- Integrated a map feature for location pinning within the web app using a custom Rest API.
- Contributed to various ongoing projects with minimal supervision, demonstrating initiative and reliability.
- Collaborated effectively with team members to resolve bug fixes and implement modifications, ensuring efficient achievement of project objectives while upholding high-quality standards.
